1. Important Information

Congratulations for having bought this product. We are sure that you will be entirely satisfied with this multi-media player. Please take some time to read thoroughly this manual of Instruction so that you can use the unit to its best possibilities. Keep carefully this instruction manual and refer to it any time when you will need it.

	In case of a faulty operation, do not attempt to repair the unit yourself. Opening the unit have you exposed to electrocution hazards. Please refer to a qualified person.
	Do not use this unit near any heating source, especially hot air vents, stove or any other appliance producing heat. Do not Expose this unit to temperatures lower than 5°C or higher than 35°C.
	Do not use this unit near a humid area as a bath, sink, swimming pool or a flowerpot.
	Do not handle the supply cable if you have wet hands. Do not use a damaged power cable.
	Do not place your unit in front of a light projector or near a heating source.
	Do not use any substance containing alcohol, gasoline, detergent or any other flammable products to clean the surface of the unit.
	Do not drop the unit or let it be subjected to impacts that could seriously damage your unit or the hard drive.
	Do not let any liquid or foreign substance be inserted inside the unit that could result in a short circuit with fire or electrocution hazards.
	Do not cut, deteriorate, or place any heavy object on the power cable that could result in a short circuit with fire or electrocution hazards.

2.Safety & Precautions

Do's and Don'ts

Do's

Unplug the player during lightning storms or when unused for long periods of time.

Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. The wide blade is provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.

Protect the power cord from being walked on or pinched, particularly at plugs, or at the point where they exit from the player.

When connecting or disconnecting AV cables or USB, disconnect the power first.

Do read all safety information and follow all instructions in this user manual.

When cleaning the So Road Movie product, disconnect the power and then wipe the unit with a soft piece of dry cloth. Do not use any chemicals or sprays for cleaning.

Visit danedigital.com for additional product information & for troubleshooting.

Don'ts

Don't expose your So Road Movie unit to heat sources or high temperatures.

Don't expose your So Road Movie unit to water, oil, dust or magnetic materials.

Don't block the vents. Free airflow should be maintained around the unit.

Don't attempt disassembling or remodeling the unit.

Don't drop the So Road Movie unit. This might cause irreversible damage to the unit and the Hard Drive.

Do not touch the power plug with wet hands or use defective power cables & electric outlets. Doing so might result in electric shock or fire. Only use attachments accessories specified by the manufacturer.

Do not mix batteries (old and new or carbon and alkaline, etc.) in the So Road Movie Remote Control. Remove batteries when the unit is not used for a long time.

2.Safety & Precautions

Limitations and Usage Precautions

Please read the following Limitations and Usage Precautions before using your So Road Movie player.

While So Road Movie players support dozens of file formats and codec, they are not intended to work with every codec-variation. So Road Movie players provide limited support to standardized versions of codec as stated in the Technical Specifications of this manual.

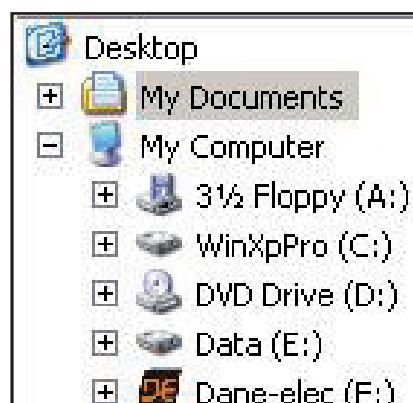

Turn off your So Road Movie player when connecting or disconnecting USB devices. Failure to do so may result in malfunction and/or loss of data on your USB device.

Step-by-Step:

- Turn on your computer and launch Windows
- Connect the So Road Movie
- Let Windows search for and automatically install the driver.
- Open "My Computer" to view your external hard drive.

If the system does not recognize the player before the cable has been connected, connect the device before launching your operating system.

Extraction Procedure :

For the security of your player and to ensure that no data is lost, please always follow the procedure below to disconnect your device. Otherwise, an error message will appear on the screen.

- Turn off all applications
- Click on the Task Bar icon for external storage devices
- Select your external hard disk and confirm that you would like it to be stopped
- Disconnect the USB cable that connects the So Road Movie to the computer.

Note: Before disconnecting any cables from your So Road Movie, turn it off.

2.Safety & Precautions

- We strongly recommend backing-up your data or media files stored on the So Road Movie. Power surge, HDD-failure, accidental deletions are common causes of data loss. Place your So Road Movie player away from magnetic sources.
- So Road Movie supports 2.5" Hard Disk Drives only.
- When connected to the computer through the USB cable the So Road Movie player works like an external USB storage device (During this operation, there is no video/audio playback).
- To resume playback mode, disconnect the USB cable connected to your PC and turn on the So Road Movie player.
- The supplied cables and accessories are recommended for customized best performance of the So Road Movie Media Player. Using any other (after-market) cables or accessories may not provide best performance
- In order to unplug your So Road Movie Media Player, press the STOP button and turning off the power before removing cables.
- Do NOT open the unit and service or modify the basic assembly. Do NOT modify the firmware of the So Road Movie unit. Improper or unauthorized repair will VOID your warranty coverage.

3. Feature

Enjoy your Movie and Video Files on TV !

Supports a variety of digital video files like DivX® 3/4/5, Xvid, MPEG1, MPEG2, MPEG4, DVD(IFO, VOB), VCD(DAT). Ideally suited for backing up all your DVD movies on a hard-Disk for easy access.

Digital Music Box

A perfect companion for the music junkies. Play variety of audio files like MP3, OGG, WMA etc. Advanced in-built Jukebox supports customized playlists and music shuffle/repeat functions.

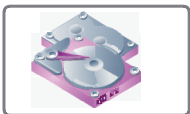

Multilanguage Subtitles

Supports multi-language .SMI, .SRT, .SUB subtitle files (for use with DivX®, XviD, AVI video and movie files)

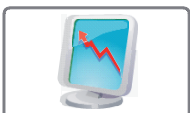

Digital Photo Album

Now enjoy your vacation photos with the family. Store and Playback all your digital photos. Enjoy customized Slideshows with background Music.

Portable HDD Storage

Quite simply, an ideal mass-storage device for all your backup and digital storage needs.

Easy Firmware Upgrading

A Simple and Efficient firmware upgrade process.
(Download: www.danedigital.com).

Firmware Upgrades provide continuous support to new codec and formats.

Car Media Center (Optional)

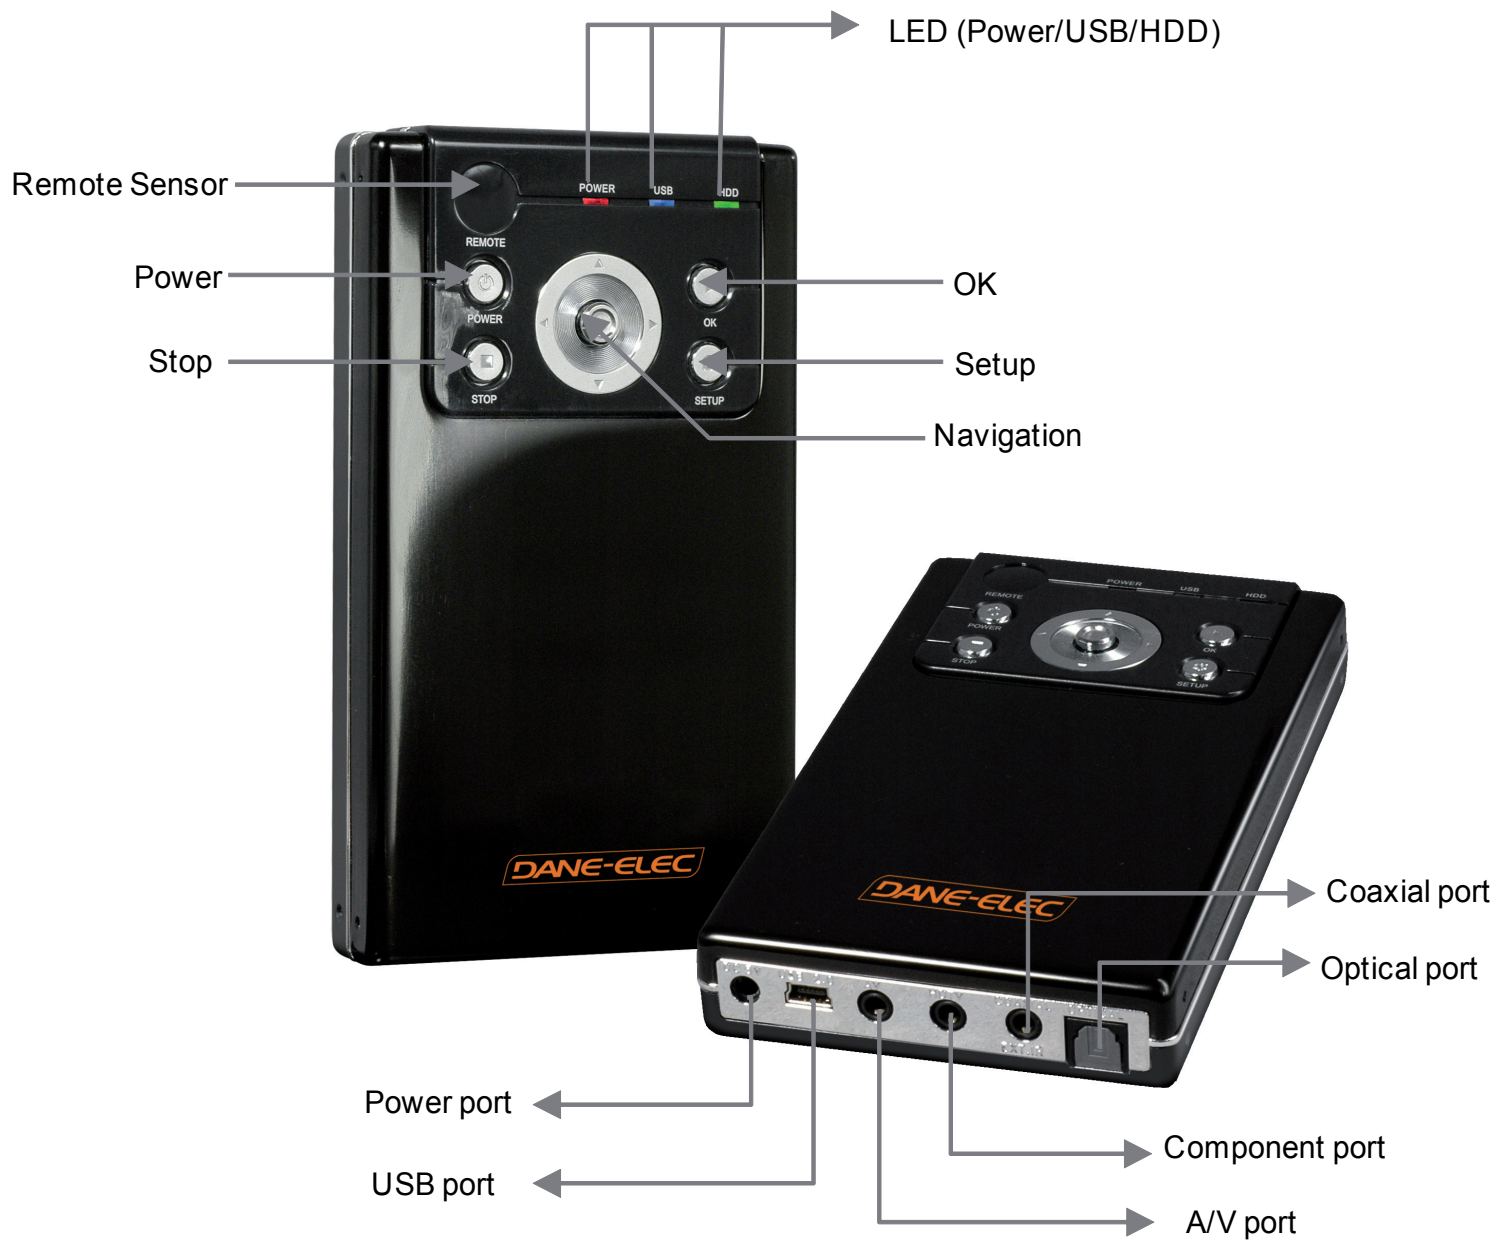

So Road Movie can also be used in a car with its optional car pack.

The Car Pack bundle contains Car Power Adapter, Ext IR Extender, Compact Remote Control and Audio Cable

- Then select "ENTER"
- Press "Set Up" to save the change

7. Using the device

- The language is amended

8. Installation and Connection

Video and Audio Connections

Your So Road Movie multimedia player supports Composite, S-Video or Component connections. Depending on the capabilities of your TV, you only need to make one video connection from these options. To hear sound through your TV, use audio connectors (RCA 2-CH) to connect the So Road Movie multimedia player to the corresponding AUDIO-IN jacks on your TV or Hi-Fi Device.

➔ Connection with ordinary (Composite) TV output

- Connect So Road Movie and your TV using the yellow video cable (cable supplied).
- Connect your So Road Movie Multimedia player and your TV to a power .
- Select appropriate video input mode on your TV until you get the initial So Road Movie screen.
- Connect left (white), right (red) sound output to the appropriate terminal of your TV or Hi-Fi Device using the 2-CH RCA cable (cable supplied).

➔ Connection to Component Output

- Connect the So Road Movie media player to your TV using a Dual cable as shown in the image above.
- Turn on the So Road Movie and TV.
- Select appropriate video input mode on your TV (in this case, Component input mode) (cable not supplied).
- Press TVOUT button on Remote Control (RC) to change AV out to Component Out on your So Road Movie
- Component connection is commonly used on most HDTV's, DLP-TV's, Plasma TVs etc.
- When you have a multi channel decoder/amplifier with coaxial input, you can enjoy 5.1CH high quality sound through coaxial cable.
The above illustration shows how to connect with coaxial cable (cable not supplied).

8. Installation and Connection

➔ Connection to Coaxial output

When you have a multi channel decoder/ amplifier with coaxial input, you can enjoy 5.1CH high quality sound through coaxial cable.

The above illustration shows how to connect with coaxial cable (cable not supplied).

➔ Connection to Optical output

When you have a multi channel decoder/ amplifier with optical input, you can enjoy 5.1CH high quality sound via optical cable.

The above illustration shows how to connect with optical cable. (cable not supplied).

➔ Connection to Computer

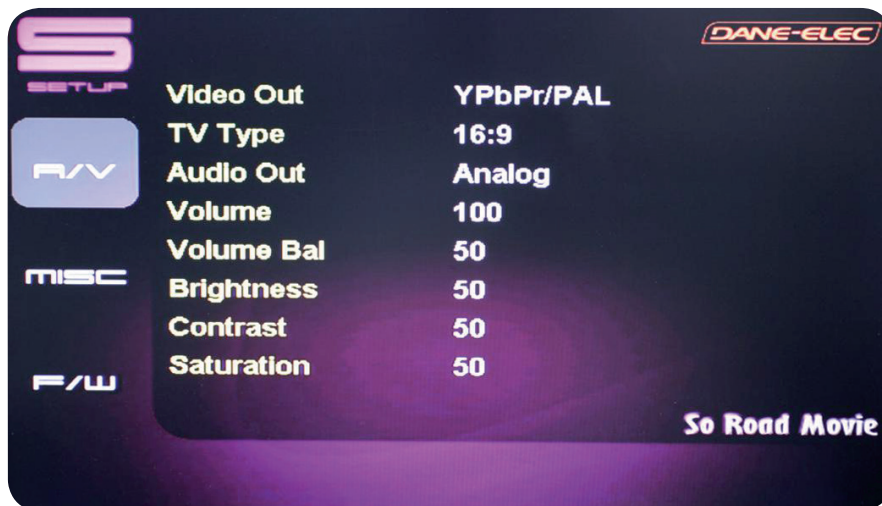

To transfer data or files from pc to your So Road Movie Multimedia Player. Connect So Road Movie Multimedia Player to your computer using the Dual USB cable (cable supplied) on the back side of your PC or on the two USB side of your notebook. When So Road Movie is connected to your PC the ON/OFF button power of the So Road Movie do not function. This button served only when the So Road Movie is connected to a TV screen with power supply.

Upon connection your PC (Win-ME/2000/XP) should recognize the new USB connected drive without installing driver.
